

# The **free** medical AI scribe

Generate perfect clinical notes that sound just like you.

Learn more at [heidihealth.com](https://heidihealth.com)

## Save up to 85% of admin time

50% of clinicians' time is not spent on patient care. Restore eye contact with your patients.

Clinicians spend over 2 hours daily on tasks other than patient care.

Clinicians suffer an annual loss of \$66,000 on average due to wasted time.

Doctors can be 2x faster and better in patient care tasks.

## Compliant & Secure

Processing a medical encounter is just about the most private thing an AI can do. So we've wrapped Heidi in best-in-class privacy standards.

### Your Own AI Twin

Every word you say, and every keystroke you press feeds into your own developing personal AI model. Watch your AI increasingly resemble your distinct style with every visit, addition, and modification.

### Customise Note Structure

Teach your AI exactly how you like your notes structured, and even save templates for re-use. No more one-size-fits-all templates; make your AI resident truly yours.

### AI Command Line

Command your AI to do just about anything to or with your note. Split into two. Change the structure. Write a referral letter. Fill out a form. Your imagination is the limit.

### Add in Your Notes

Type mid-visit addendums you'd like Heidi to incorporate, without verbalising aloud. Stop scaring your patients.

## Try Heidi, it's FREE!

Yep, that's right. AI medical scribe is FREE for all clinicians - no credit card, no strings.

You can try Heidi on your computer or on your mobile.
