

Smarter Notes, Better Care

Your clinician may use Heidi AI technology to document your consultation today.

What does this mean for you?

How Heidi works?

Heidi takes notes in real time so your clinician can focus on you.

Your consent matters

Clinicians must ask for your consent before using Heidi with you. You can opt out anytime.

Who can see your info?

Only your clinician can access it. Heidi follows the Privacy Act 2020 to keep your data private.

Data use & protection

Your data is used responsibly and kept safe with high security standards.

No recordings kept

Heidi only creates notes, no voice recordings are saved.

Where your data is stored?

Securely and confidentially stored on cloud servers in Australia.
